Turning Cybersecurity Complexity Into Clear, Trusted Guidance With Workshops and Webinars

PRIMEX needed dependable cybersecurity insight; SecuredbyCSS delivered expert-led sessions that became a trusted resource.

Executive Summary

PRIMEX needed a reliable way to strengthen cybersecurity understanding across its organization without adding confusion or inconsistency. SecuredbyCSS addressed that need through collaborative workshops and webinars led by cybersecurity specialist Horacio Maysonet. The result was a high-quality, dependable learning resource that gave PRIMEX clearer guidance, stronger confidence, and a trusted partner for ongoing cybersecurity education.

Challenges

- PRIMEX needed dependable cybersecurity guidance teams could trust when evaluating fast-changing risks and priorities.
- Internal stakeholders needed clearer explanations of cybersecurity topics to support informed discussions and decisions.
- The organization needed expert-led learning resources that were practical, consistent, and relevant across audiences.
- PRIMEX wanted a collaborative partner that could deliver high-quality workshops and webinars with credibility.

SecuredbyCSS's Approach

Key Actions:

- SecuredbyCSS worked closely with PRIMEX to shape a collaborative engagement around cybersecurity education.
- The team delivered workshops designed to explain complex cybersecurity topics with clarity and practical context.
- They provided webinars that served as a dependable ongoing resource for organizational learning and awareness.
- Horacio Maysonet led with professionalism, helping translate specialist knowledge into understandable guidance.

Solutions

- A structured cybersecurity education program gave PRIMEX reliable access to expert insight and guidance.
- Interactive workshops improved how cybersecurity concepts were communicated across the organization.
- Webinar-based knowledge sharing created a repeatable resource PRIMEX could rely on over time.
- Specialist-led advisory support increased confidence by bringing clarity and professionalism to every session.

The Result

- PRIMEX gained a trusted source of cybersecurity knowledge to support internal learning and ongoing decision-making.
- Workshops were consistently viewed as high quality, reinforcing confidence in the value of the engagement.
- Webinars became a valuable and reliable resource the organization could return to for guidance.
- Stakeholders benefited from clearer understanding of cybersecurity topics through expert-led communication.
- The collaboration strengthened PRIMEX's confidence in SecuredbyCSS as a professional cybersecurity partner.

It is always a pleasure to collaborate with your team. The workshops are of excellent quality, and the webinars are a valuable and reliable resource for our organization. Horacio Maysonet always brings clarity, professionalism, and great value.
